No: IIPHS/2021/Ads/1/54/114 **Date: 19th November 2026**

Position: Field Supervisor/ Project Nurse III
Location: Aizawl, Mizoram
Number of Posts: 1 (One)
Duration of position: 1 year (renewable based on performance)

About IIPHS:
The Indian Institute of Public Health (IIPH) Shillong is a regional institute of public health in the northeast region of India. It was established in 2015 by the Public Health Foundation of India in collaboration with the Government of Meghalaya to redress the limited institutional and systems capacity in public health in the North Eastern Region of India. IIPH Shillong mandates include research interdisciplinary education and advocacy. IIPH Shillong had been upgraded to a university through the IIPH Shillong Act passed in the legislative assembly in 2026.

About Zoram Medical and Hospital:

Zoram Medical College and Hospital (ZMC&H) is the first medical college of Mizoram. It was established in 2018 by the Govt. of Mizoram with the aim of achieving medical excellence through quality education and research. It offers MBBS, Postgraduate and Public Health courses. The college is one of the Collaborators of ICMR- Centre for Advanced Research Project titled **"Implementation Science Trials and Training Hub for Maternal and Child Health in the Northeast States (ISTHMUS): Strengthening Evidence, Capacity, and Policy Translation"** based in IIPH, Shillong.

Project Brief:
The Implementation Science Trials and Training Hub for Maternal and Child Health in the North Eastern States (ISTHMUS) aims to address the "know-do gap" in maternal and child health by strengthening implementation science capacity and health-system practice in the North Eastern Region (NER) of India. The overall goal of ISTHMUS is to strengthen implementation science research, capacity, and health-system practice to improve maternal and child health outcomes in the NER. Through a Centre for Advanced Research (CAR), ISTHMUS will bring together researchers, health-system stakeholders, and partners to conduct collaborative research, build implementation science capacity, and generate locally relevant evidence. The initiative will work with four states i.e. Meghalaya, Mizoram, Assam and Tripura to identify implementation challenges, develop and evaluate scalable, context-responsive strategies, and establish an iterative learning system to support continuous adaptation, improvement, and uptake of evidence into routine health systems.

Roles and Responsibilities

- Supervise field staffs and assign daily targets, geographic mapping, and household/facility visits.
- Coordinate participants follow up.
- Support implementation of intervention activities.
- Manage field logistics including movement plans, travel, distribution of survey materials, data collection devices and medical/lab kits.

- Collect samples, proper labelling, ensure proper storage and transport to the laboratory if required.
- Data collection, data entry and overall data management.
- Resolve real-time operational issues faced by field staff, including access barriers, community reluctance, or equipment failures.
- Review completed survey forms daily for completeness, consistency, and logical errors before uploading or submitting them to the central data management team.
- Ensure all team members strictly adhere to standard operating procedures (SOPs), sampling protocols, and data collection tools.
- Liaise with local authorities, public health facilities (e.g., DH, CHCs, PHCs, HWCs), village leadership, Panchayats, or community heads to secure permissions and cooperation.
- Work closely with local health workers (e.g., ASHAs, ANMs, Anganwadi workers) to facilitate field activities.
- Ensure that valid informed consent (and assent where applicable) is taken from participants using approved scripts/forms before any data or samples are collected.
- Enforce strict data privacy, participant confidentiality, and safeguard sensitive health data in accordance with ethics committee guidelines.
- Provide immediate feedback, ongoing mentoring, and retraining to field staff struggling with survey techniques or electronic data tools.
- Prepare and submit daily/weekly field progress reports to the Project supervisor or Project Coordinator or Principal Investigator, highlighting target achievements, challenges, and field insights.
- Undertake any other duties related to the project as assigned by the Principal Investigator or immediate supervisor.
